

## DECEMBER 2018 QUARTERLY REPORT

**Piedmont Lithium Limited (ASX: PLL; NASDAQ: PLL) ("Piedmont" or "Company")** is pleased to present its December 2018 quarterly report.

Highlights during and subsequent to the quarter were:

- Commenced a new 25,000-meter Phase 4 drill program at the Piedmont Lithium Project ("Project"), with 19,000 meters allocated for infill and exploration drilling on the Core property and 6,000 meters allocated for exploration drilling on the Central and Sunnyside properties;
- Increased land position of the Project by 15% to 1,383 acres, including 93 acres which are contiguous to the Core property increasing it by 18% to a total of 622 acres. Drill targets from the new properties have been incorporated into the current drilling program;
- Submitted key permit applications for the Project, including a Section 404 Standard Individual Permit application to the US Army Corps of Engineers (USACE) and a Section 401 Individual Water Quality Certification to the North Carolina Division of Water Resources (NCDWR);
- Completed initial exploratory drilling on the Company's new Sunnyside and Central properties in the Carolina Tin-Spodumene Belt ("TSB"), which returned encouraging results, including the Project's widest intercept to-date; and
- Completed the first tranche of a private placement of 111 million shares at an issue price of A\$0.11 per share to raise gross proceeds of A\$12.2 million. Proceeds will be used for drilling to expand and upgrade the resource base at the Project, as well as for permit applications, metallurgical testwork, additional engineering studies, and ongoing land consolidation.

### Next steps:

- Piedmont will complete the Phase 4 drill program and seek to extend Project life through an increase in the Project's Mineral Resource;
- Further metallurgical studies, including evaluating the potential for a Dense Medium Separation ("DMS") before the flotation circuit, to further enhance operating costs in the concentrator;
- Complete permit applications and secure the necessary permits and approvals to commence mining and processing operations at the Project; and
- Continue expansion of the Company's land position in the Carolina Tin-Spodumene Belt ("TSB") with a focus on areas of high mineral prospectivity.

## Project Overview

Piedmont Lithium Limited (ASX: PLL; Nasdaq: PLL) holds a 100% interest in the Piedmont Lithium Project located within the TSB and along trend to the Hallman Beam and Kings Mountain mines, which historically provided most of the western world's lithium between the 1950s and the 1980s. The TSB has been described as one of the largest lithium regions in the world and is located approximately 25 miles west of Charlotte, North Carolina.

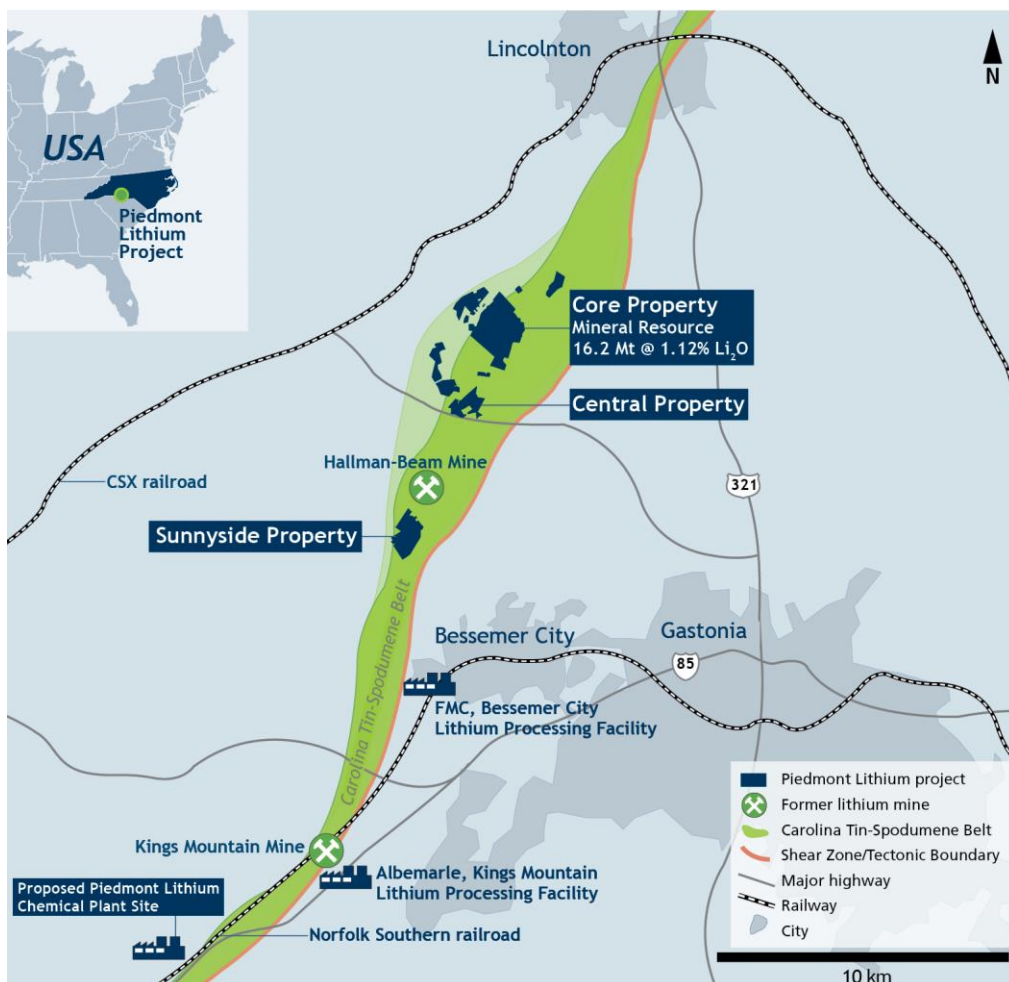

Figure 1: Piedmont Lithium Project located within the TSB

In September 2018 the Company published a Scoping Study for an integrated lithium hydroxide business based on a maiden Mineral Resource estimate of 16.2 million tonnes ("Mt") grading at 1.12% Li<sub>2</sub>O which featured a 13-year project life, NPV<sub>8</sub> of US\$888 million, a US\$3,112 per tonne lithium hydroxide operating cost, and a US\$193 per tonne spodumene concentrate operating cost.

## Phase 4 Drilling Program

Subsequent to the end of the quarter, the Company commenced a 25,000-meter Phase 4 drill program at the Piedmont Lithium Project ("Project").

Two drill rigs were mobilized to the Core property and one rig is in place at the Central property. The Core program will consist of approximately 110 holes totaling 19,000 meters and is designed to drill the Exploration Target areas reported June 14, 2018, perform initial drilling on newly acquired properties contiguous to the Core property, and upgrade portions of the current Mineral Resource Estimate from Inferred to Indicated classification. The remaining 6,000 meters is allocated to follow-up drilling on the Central property, the Sunnyside Property, and new or other properties not yet drilled, with the potential to define a Mineral Resource Estimate on one or more of these additional properties.

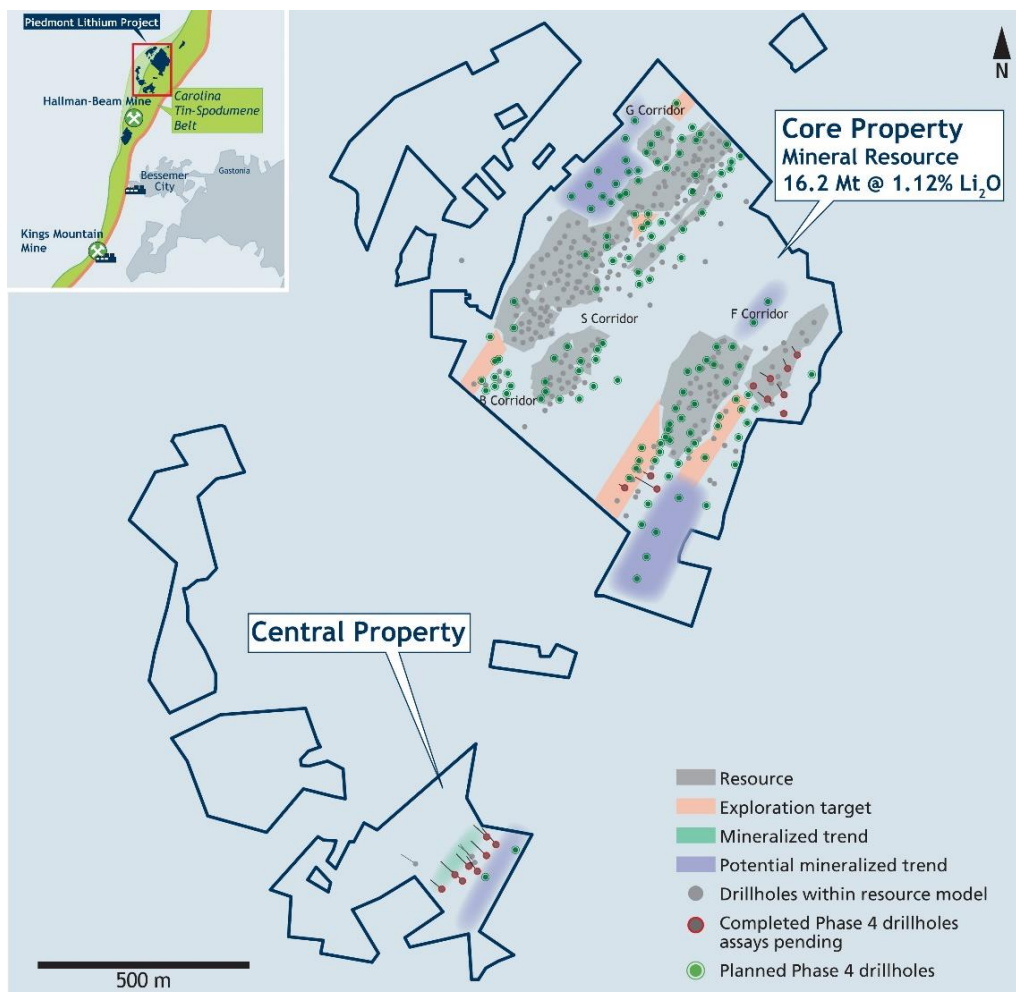

Figure 2: Core and Central Properties with Resource, Exploration Targets, and mineralized trends

## Expanded Land Position

During the quarter, the Company increased its exploration land position to 1,383 acres. The land acquisitions include properties within the Carolina Tin Spodumene Belt (122 acres), and preferred locations for the concentrator and mine infrastructure (49 acres). Importantly, these acquisitions include 93 acres which are contiguous to the Core Property land package increasing it to a total of 622 acres. The Company also controls a 60-acre parcel in Kings Mountain, North Carolina for the site of the Company's planned Chemical Plant.

These important additions were achieved via a combination of option agreements and deferred purchase contracts, making effective use of Company funds to maximize exploration opportunities.

The most significant tracts, with regards to the current resource, are in the south-east and western portions of the Core Property. In the south east, a newly acquired 55-acre tract adds over 600 meters of highly prospective strike length along the F Corridor and a newly acquired 20 acres in the west adds over 400 meters of highly prospective strike length along the B Corridor.

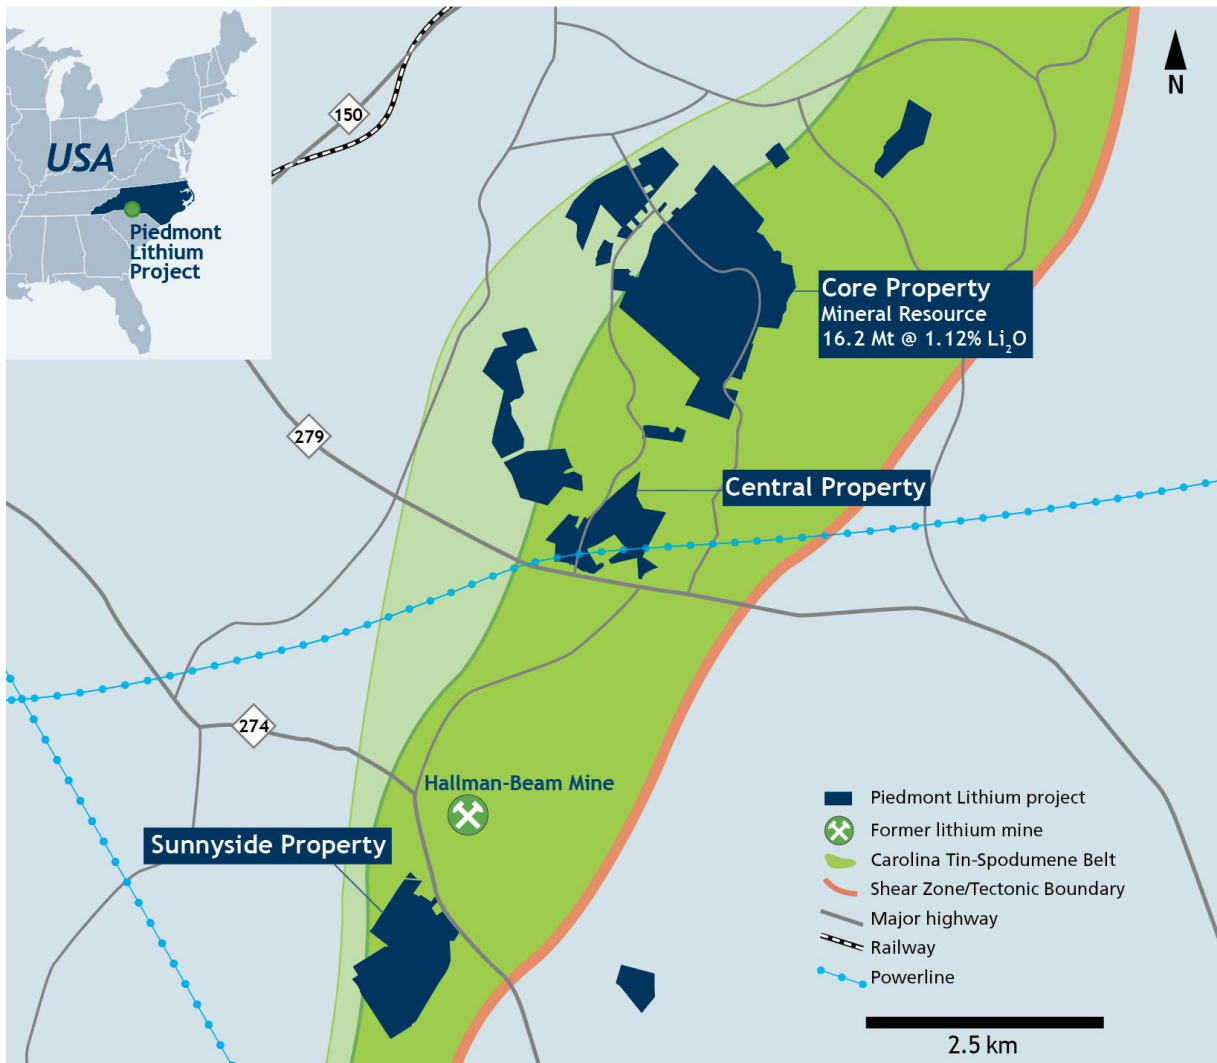

Figure 3: Piedmont Lithium Land Position at December 31, 2018

## Submission of Permit Applications

During the quarter, the Company submitted a Section 404 Standard Individual Permit application to the US Army Corps of Engineers ("USACE") for the Project. The USACE is the lead agency that will review the Company's permit applications at the federal level.

The Company also concurrently submitted an application for a Section 401 Individual Water Quality Certification to the North Carolina Division of Water Resources ("NCDWR"). The Section 404 and 401 permits are typical requirements for the type of operation proposed by Piedmont Lithium. HDR Engineering's Charlotte Office acted as lead consultant in the preparation of both applications.

These important applications were completed and submitted in accordance with the Company's previously announced estimated permitting timeline (refer to updated Scoping Study announced September 13, 2018), allowing Piedmont to maintain its overall project development schedule.

## Exploratory Drilling at Central and Sunnyside Properties

During the quarter, the Company received assay results from its initial exploratory drilling on its Sunnyside and Central properties.

This maiden drill program comprised 10 holes, 7 from Sunnyside and 3 from Central, totaling 1,411 meters. Both properties yielded significant intercepts of high-grade lithium mineralization, including:

- **34.0m @ 1.04% Li<sub>2</sub>O** of continuous mineralization across one pegmatite in Hole 18-CT-002; and
- **20.9m @ 1.42% Li<sub>2</sub>O** of continuous mineralization across one pegmatite in Hole 18-SS-00.

Piedmont was encouraged by the initial drill results from Central and Sunnyside properties and has designed follow-up drilling as part of the Phase 4 drilling program. In addition, over 650 soil samples have been collected and over 33-line kilometers of walking magnetometer geophysical surveys have been undertaken on the properties.

## Capital Raising

During the quarter, the Company completed the first tranche of a placement of 111 million shares at an issue price of A\$0.11 per share to raise gross proceeds of A\$12.2 million ("Placement").

Proceeds from the Placement will be used for exploration and infill drilling to expand and upgrade the resource base at the Company's 100% owned Piedmont Lithium Project ("Project") located in the world-class Carolina Tin-Spodumene Belt ("TSB") in the United States, as well as for permit applications, pilot-scale metallurgy, additional engineering studies, and ongoing land consolidation.

The first tranche of the Placement comprised 107.6 million shares to institutional and sophisticated investors to raise gross proceeds of A\$11.8 million. The second tranche of the Placement, comprising 3.4 million shares to Directors to raise gross proceeds of A\$0.4 million, will be issued subject to shareholder approval at a General meeting to be held on January 31, 2019.

## Exploration Interests

As at December 31, 2018, the Company owns or has entered into exclusive option agreements or land acquisition agreements with local landowners, which upon exercise, allow the Company to purchase (or in some cases long-term lease) approximately 1,383 acres of surface property and the associated mineral rights from the private landowners. During the quarter, the Company entered into exclusive option agreements and/or land acquisition agreements with local landowners for an additional approximately 151 acres of surface property and the associated mineral rights from the private landowners.

## **Forward Looking Statements**

This announcement may include forward-looking statements. These forward-looking statements are based on the Company's expectations and beliefs concerning future events. Forward looking statements are necessarily subject to risks, uncertainties and other factors, many of which are outside the control of the Company, which could cause actual results to differ materially from such statements. The Company makes no undertaking to subsequently update or revise the forward-looking statements made in this announcement, to reflect the circumstances or events after the date of that announcement.

## **Cautionary Note to United States Investors Concerning Estimates of Measured, Indicated and Inferred Resources**

The information contained in this presentation has been prepared in accordance with the requirements of the securities laws in effect in Australia, which differ from the requirements of U.S. securities laws. The terms "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are Australian terms defined in accordance with the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the "JORC Code"). However, these terms are not defined in Industry Guide 7 ("SEC Industry Guide 7") under the U.S. Securities Act of 1933, as amended (the "U.S. Securities Act"), and are normally not permitted to be used in reports and filings with the U.S. Securities and Exchange Commission ("SEC"). Accordingly, information contained herein that describes Piedmont's mineral deposits may not be comparable to similar information made public by U.S. companies subject to reporting and disclosure requirements under the U.S. federal securities laws and the rules and regulations thereunder. U.S. investors are urged to consider closely the disclosure in Piedmont's Form 20-F, a copy of which may be obtained from Piedmont or from the EDGAR system on the SEC's website at <http://www.sec.gov/>.

## **Competent Persons Statements**

The information in this presentation that relates to Exploration Results is extracted from the Company's ASX announcements dated August 23, 2018, July 19, 2018, June 14, 2018, June 7, 2018, May 17, 2018, May 10, 2018, April 9, 2018, 4 April 2018, 15 March 2018, 1 December 2017, 2 November 2017, 27 September 2017, 23 May 2017, 3 April 2017, and 18 October 2016 which are available to view on the Company's website at [www.piedmontlithium.com](http://www.piedmontlithium.com).

The information in this presentation that relates to Exploration Targets and Mineral Resources is extracted from the Company's ASX announcement dated June 14, 2018 which is available to view on the Company's website at [www.piedmontlithium.com](http://www.piedmontlithium.com).

The information in this presentation that relates to Metallurgical Testwork Results is extracted from the Company's ASX announcements dated September 4, 2018 and July 17, 2018 which are available to view on the Company's website at [www.piedmontlithium.com](http://www.piedmontlithium.com).

The information in this presentation that relates to Process Design, Process Plant Capital Costs, and Process Plant Operating Costs is extracted from the Company's ASX announcements dated September 13, 2018 and July 19, 2018 which are available to view on the Company's website at [www.piedmontlithium.com](http://www.piedmontlithium.com).

The information in this presentation that relates to Mining Engineering and Mine Schedule is extracted from the Company's ASX announcements dated September 13, 2018 and July 19, 2018 which are available to view on the Company's website at [www.piedmontlithium.com](http://www.piedmontlithium.com).

Piedmont confirms that: a) it is not aware of any new information or data that materially affects the information included in the original ASX announcements; b) all material assumptions and technical parameters underpinning Mineral Resources, Exploration Targets, Production Targets, and related forecast financial information derived from Production Targets included in the original ASX announcements continue to apply and have not materially changed; and c) the form and context in which the relevant Competent Persons' findings are presented in this report have not been materially modified from the original ASX announcements.

**Notes**

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
